 (C) Let's ask someone for help.
 (D) I feel hungry now.
 53. (A) There goes a young woman.
 (B) Here comes a police officer.
 (C) We are sure to find it.
 (D) Aren't you ready to get off?

三、閱讀測驗 14% (每題 2 分)

We all have seen rainbows after the rain or near waterfalls during the day, but do you know there are rainbows at night?

Night rainbows are known as "moonbows." Sunlight leads to rainbows, but moonlight leads to moonbows.

We seldom see moonbows because they only happen once in a blue moon. The weather must right for moonbows. To watch moonbows appear, a bright full moon is needed, and the moon has to be very low in the sky. The night sky must be very dark, and of course, there are water drops in the air.

(背面尚有試題)

Moonbows have the same colors as rainbows. However, moonbows appear to be white to naked eyes. This is because their colors are not bright enough due to the weak moonlight. The best way of seeing moonbows is to use a camera. If you want to take photos of a moonbow, the best place is near the waterfall. One of the most famous places in the world is Yosemite National Park, USA. (美國優勝美地國家公園)

If you are lucky enough to see a moonbow, don't miss it! Moonbows are very brief, so when you look again, they might be gone.

waterfall 瀑布 be known as 以..有名 lead to 導致
 appear 出現 water drop 水珠 naked eye 肉眼
 due to 由於 gone 消失

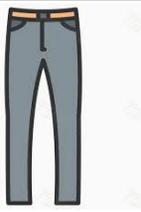

57. How many days is the sale?
 (A) Three weeks. (B) A month.
