Questions 36-37
Write for the Ocean
Ms. Chen: Sam, what are you doing?
Sam: I joined a poetry contest. Its aim is to let people care more about the ocean. I need to write a poem about the ocean.
Ms. Chen: Sounds great. Let's see your poem.
Sam: Here it goes.
O is for only; you only have me.
C is for clean; you should make me clean.
E is for easy going; everyone can get along with me.
A is for always; always take care of me.
N is for never; hey, never say never! You can do this.
Who are you? You are everything for me.
What am I? I am the only one for you.
Ms. Chen: Can you tell me more about your thoughts?
Sam: The ocean is *unique*; we can't find another one. So, we should protect the ocean.
Ms. Chen: What does the sentence "E is for easy going; everyone can get along with me." mean?
Sam: The ocean is everyone's friend. For example, kids can play and swim in the water. Fishermen can catch fish.
Ms. Chen: Good! How about the *never* sentences?
Sam: Don't say "impossible." We have the power to help protect the ocean.
Ms. Chen: Your ideas are good. Maybe I should get other students to write for the ocean, too.

Questions 38-39
Our Planet
　　Our planet is very special, and we must look after it. Everyone has an important role in making sure we keep it clean and safe. We also have a responsibility to look after everything that lives in it, including people, plants and animals. However, one huge problem that we have now is Plastic Pollution, which is damaging our planet and many animals living on it.

What Is Plastic Pollution?
　　Plastic Pollution is when plastic that has been thrown away ends up in oceans and rivers, on beaches and in the countryside. Many things we use every day are made of plastic. Plastic is very cheap and strong. However, when it is thrown away, it lasts a long time and is hard to break down. Lots of plastic ends up in oceans where it traps and harms fish and other sea animals.

Questions 40-42

Say hello to ChatGPT, the robot who can answer your questions!

ChatGPT is a smart robot created by OpenAI that can understand and answer your questions. It can understand the natural language that you type, which means you can ask it anything in English, and it will do its best to give you an answer that will help you.

How does ChatGPT work?

ChatGPT uses something called deep learning, which is a type of machine learning that allows it to process large amounts of data and learn from it. ChatGPT was trained using large dataset of text from the Internet, including books, articles, and websites. This training helped it to learn the rules of language and how people use words and phrases.

Once ChatGPT has been trained, you can type a question or statement into its system. It then analyzes your input and tries to show a response that makes sense based on its understanding of the language. It can even keep a conversation going by using the context of the previous questions and answers.

What can you ask ChatGPT?

You can ask ChatGPT anything you like! It's like having a really smart friend who knows everything. You can ask it about history, science, math, literature, or anything else that interests you. You can even ask it for advice, opinions, or just to chat. However, remember that ChatGPT is not perfect and may not always have the right answer you're looking for, but it will try its best to provide you with the most accurate information it can find.

Why is ChatGPT useful?

ChatGPT can be useful in many ways. It can help you learn new things and answer questions that you may not have been able to find the answer so far. ChatGPT can also be used as a tool for research, allowing you to quickly find information on a particular topic. Lastly, ChatGPT can be a fun way to kill your time, as it can chat with you about a wide range of topics and is always ready for a conversation.

Overall, ChatGPT is a fantastic tool that can help you learn, do research, and have fun. So next time when you have a question or just want to chat with someone, why not give ChatGPT a try?

📖 process 處理 statement 說明 analyze 分析

40. (　　) What is ChatGPT?
(A) A robot that can answer your questions.
(B) A superhero from a movie.
(C) A new popular video game.
(D) A leaning website of languages.

41. (　　) How does ChatGPT work?
(A) It uses deep learning to process data and understand natural language.
(B) It only answers to specific programmed questions.
(C) It works by analyzing the user's voice.
(D) It only helps to look for some basic information.

42. (　　) Which is **TRUE** about ChatGPT?
(A) It can help you learn new things and answer questions that you may not know.
(B) It can only be used as a fun way to kill your time.
(C) It can be your teacher to teach all the subjects.
(D) It is not useful at all.
