"Hey, are you phubbing me?" Have you ever heard people say this? It means that you are playing with your phone and not pay attention to others. "Phub" is a new word which was made up from phone and snub. Snub means you are not paying attention to someone or something when you should be. It's usually impolite to do that. So, this new word means you only pay attention to your phone and **ignore** people around you.

Now, imagine that you are talking to your friends, and they just start checking their phones. Some of them even begin sending messages through LINE and posting pictures on Facebook as if you were not here. How does that make you feel?

However, many of us are doing the same thing to our friends without thinking about it. A survey showed that 33% of people admitted that they've been phubbers, and 27% said that they always answer their phones in the middle of face-to-face conversations.

Tired of being ignored by people on phones, an Australian student, named Alex Haigh, started an activity to stop phubbing. He hoped that people should have a face-to-face conversation in life, instead of being phubbers all the time.
